PROFESSIONAL SUMMARY

Software Developer with 1+ year of experience building enterprise applications, REST APIs, mobile apps, and computer vision automation systems. Developed and deployed internal applications on IIS servers, built workflow automation tools, and worked with Flutter, ASP.NET, MSSQL, Python, Docker, AWS, Nginx, CI/CD, and Linux.

WORK EXPERIENCE

Software Developer

Apr 2025 - Present

The Institute of Company Secretaries of India, Noida

- Developed internal applications to automate examination workflows and reduce repetitive manual processing.
- Built REST APIs with ASP.NET, ADO.NET, and MSSQL for internal business systems.
- Created Flutter and Android applications supporting internal communication and operational processes.
- Deployed and maintained internal applications on IIS servers and resolved production issues.
- Reduced manual OMR verification effort by 95% by implementing YOLO and OpenCV-based automation.

PROJECTS

Examiner Portal

ASP.NET | MSSQL | JS | SignalR | QR Authentication

- Built a portal for examiner onboarding, biodata submission, and offer acceptance.
- Integrated live face verification using desktop/laptop webcams.
- Created a QR-based verification flow for users without webcams or with poor camera quality.
- Enabled mobile face capture and real-time image sync using SignalR.
- Reduced manual verification efforts and improved processing speed.

OMR Detection System

Python | YOLO | OpenCV | EfficientNetV2

- Built an automated OMR processing system to detect filled bubbles and extract roll number, subject code, and centre code from scanned answer sheets.
- Implemented page number detection and missing sequence validation using YOLO and EfficientNetV2, achieving 95% accuracy while reducing manual verification workload by 95% and saving processing time.

Exam Admin Application

Flutter | GetX | Rest API | ASP.NET | MSSQL

- Built internal Flutter application for ICSI exam department operations.
- Implemented secure real-time messaging between departments.
- Developed answer-book tracking system.
- Built manpower monitoring and center payment tracking modules.
- Created expense logs and live operational dashboards.

Caller ID Application

Android (Java) | ASP.NET | MSSQL

- Built a Truecaller-like Caller ID app using native Android (Java) to detect incoming calls and display overlay caller details.
- Integrated internal APIs with MSSQL database to validate phone numbers and fetch user information in real time.

Cab Booking Application

Flutter | Firebase | Google Maps API

- Built a complete ride-booking workflow with authentication, trip management, and real-time tracking.
- Integrated Firebase Cloud Messaging and Google Maps for notifications, routing, and location updates.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, JavaScript, Dart, SQL

Frameworks & Platforms: Flutter, ASP.NET, ADO.NET, Android SDK

Databases: MSSQL, MySQL, Firebase, MongoDB

Cloud & DevOps: AWS, Docker, VPS, IIS, Nginx, CI/CD

AI & Computer Vision: YOLO, OpenCV, EfficientNetV2, MobileNetV2/v3

Systems & Tools: Linux Administration, Troubleshooting

EDUCATION

MCA, SRM Institute of Science & Technology

CGPA: 8.18 | 2023 - 2025

BCA, Maulana Mazharul Haque Arabic & Persian University

62% | 2018 - 2021
